Manager, Compliance (Ministerial Statements)
Department of Water and Environmental Regulation
Locked Bag 10
Joondalup DC WA 6919
Via E-mail: compliance@dwer.wa.gov.au

Dear Sir / Madam,

Ministerial Statement 930 - Anketell Point Port Development, Antonymyre, Shire of Roebourne, Compliance Assessment Report.

API Management Pty Limited (APIM) received Ministerial approval for the West Pilbara Iron Ore Project (WPIOP) Stage 1: Anketell Point Port Development on 30 January 2013.

Condition 4-6 of Ministerial Statement 930 (MS 930) requires APIM to submit a Compliance Assessment Report annually from the date of submission of the first compliance assessment report.

Implementation of the port development has not commenced and there has consequently been no ground disturbance or other construction activity during the period 31 January 2022 to 30 January 2023. Additionally, this is the same up to 30 November 2023; no activity has been undertaken in the project area and the project remains compliant with conditions under MS930. In accordance with advice previously received from the Compliance Branch, APIM hereby submits this letter, Statement of Compliance, and updated Audit Table to fulfil the requirement for a Compliance Assessment Report.

A review was undertaken of the Compliance Assessment Plan as required under condition MS930:M4-1.

As there is an assessment process still underway for an extension of the Time Limit of Authorisation (Condition 3) for the proposal implementation (EPA Assessment 2162) under a s46 application / Ministerial Inquiry, changes are likely to be made to the implementation conditions and therefore a review of the Compliance Assessment Plan (CAP) will be undertaken post this assessment.

Consequently, no changes are recommended as per condition MS930:M4-6(5).

While the audit of compliance was completed, the documentation was not submitted at the time stated in the CAP. We apologise for this oversight.

Please do not hesitate to contact me ([08] 9423 0248; [pdavidson@apijv.com.au](mailto:p davidson@apijv.com.au)) should you require any further information.

Yours sincerely,

A handwritten signature in blue ink that reads 'P. J. Davidson'.

Phillip Davidson

Statement of Compliance

1. Proposal and Proponent Details

Proposal Title	Anketell Point Port Development, Antonymyre, Shire of Roebourne
Statement Number	930
Proponent Name	API Management Pty Limited
Proponent's Australian Company Number (where relevant)	112 677 595

2. Statement of Compliance Details

Reporting Period	31/01/22 to 30/01/23
------------------	-----------------------------

Implementation phase(s) during reporting period (please tick ✓ relevant phase(s))							
Pre-construction	✓	Construction		Operation		Decommissioning	

Audit Table for Statement addressed in this Statement of Compliance is provided at Attachment:	2
<p>An audit table for the Statement addressed in this Statement of Compliance must be provided as Attachment 2 to this Statement of Compliance. The audit table must be prepared and maintained in accordance with the Department of Water and Environmental Regulation (DWER) <i>Post Assessment Guideline for Preparing an Audit Table</i>, as amended from time to time. The 'Status Column' of the audit table must accurately describe the compliance status of each implementation condition and/or procedure for the reporting period of this Statement of Compliance. The terms that may be used by the proponent in the 'Status Column' of the audit table are limited to the Compliance Status Terms listed and defined in Table 1 of Attachment 1.</p>	

Were all implementation conditions and/or procedures of the Statement complied with within the reporting period? (please tick ✓ the appropriate box)			
No (please proceed to Section 3)	✓	Yes (please proceed to Section 4)	

Each page (including Attachment 2) must be initialed by the person who signs Section 4 of this Statement of Compliance.
INITIALS:

3. Details of Non-compliance(s) and/or Potential Non-compliance(s)

The information required Section 3 must be provided for each non-compliance or potential non-compliance identified during the reporting period covered by this Statement of Compliance.

Non-compliance/potential non-compliance 3-1

Which implementation condition or procedure was non-compliant or potentially non-compliant?
A technical non-compliance occurred due to the late submission of the Compliance Assessment Report to the Department. Due date was the 24 April 2023.
Was the implementation condition or procedure non-compliant or potentially non-compliant?
The submission of the Compliance Assessment Report was late due to an oversight in submitting the assessment at the time it was completed 24 April 2023.
On what date(s) did the non-compliance or potential non-compliance occur (if applicable)?
24 April 2023.

Was this non-compliance or potential non-compliance reported to the Chief Executive Officer, DWER?	
<input checked="" type="checkbox"/> Yes <input type="checkbox"/> Reported to DWER verbally Date _____ <input checked="" type="checkbox"/> Reported to DWER in writing Date 30/11/2023 this report	<input type="checkbox"/> No

What are the details of the non-compliance or potential non-compliance and where relevant, the extent of and impacts associated with the non-compliance or potential non-compliance?
No impacts – technical non-compliance due to late report submission date.
What is the precise location where the non-compliance or potential non-compliance occurred (if applicable)? (please provide this information as a map or GIS co-ordinates)
Not applicable
What was the cause(s) of the non-compliance or potential non-compliance?
Late submission of the compliance assessment report due to administrative oversight.
What remedial and/or corrective action(s), if any, were taken or are proposed to be taken in response to the non-compliance or potential non-compliance?
Compliance Database corrected to provide advanced warning on impending submission date.
What measures, if any, were in place to prevent the non-compliance or potential non-compliance before it occurred? What, if any, amendments have been made to those measures to prevent re-occurrence?
Not applicable
Please provide information/documentation collected and recorded in relation to this implementation condition or procedure:
<ul style="list-style-type: none"> in the reporting period addressed in this Statement of Compliance; and as outlined in the approved Compliance Assessment Plan for the Statement addressed in this Statement of Compliance. (the above information may be provided as an attachment to this Statement of Compliance)

Each page (including Attachment 2) must be initialed by the person who signs Section 4 of this Statement of Compliance.
 INITIALS: *RS*

4. Proponent Declaration

I, **Phillip Davidson, Manager - Environment** declare that I am authorised on behalf of **Robert Beeck – General Manager API Management Pty Ltd** (being the person responsible for the proposal) to submit this form and that the information contained in this form is true and not misleading.

Signature:.....

Date: 30 November 2023

Please note that:

- it is an offence under section 112 of the *Environmental Protection Act 1986* for a person to give or cause to be given information that to his knowledge is false or misleading in a material particular; and
- the Chief Executive Officer of the DWER has powers under section 47(2) of the *Environmental Protection Act 1986* to require reports and information about implementation of the proposal to which the statement relates and compliance with the implementation conditions.

5. Submission of Statement of Compliance

One hard copy and one electronic copy (preferably PDF on CD or thumb drive) of the Statement of Compliance are required to be submitted to the Chief Executive Officer, DWER, marked to the attention of Manager, Compliance (Ministerial Statements).

Please note, the DWER has adopted a procedure of providing written acknowledgment of receipt of all Statements of Compliance submitted by the proponent, however, the DWER does not approve Statements of Compliance.

6. Contact Information

Queries regarding Statements of Compliance, or other issues of compliance relevant to a Statement may be directed to Compliance (Ministerial Statements), DWER:

ATTACHMENT 1

Table 1 Compliance Status Terms

Compliance Status Terms	Abbrev	Definition	Notes
Compliant	C	Implementation of the proposal has been carried out in accordance with the requirements of the audit element.	This term applies to audit elements with: <ul style="list-style-type: none"> ongoing requirements that have been met during the reporting period; and requirements with a finite period of application that have been met during the reporting period, but whose status has not yet been classified as 'completed'.
Completed	CLD	A requirement with a finite period of application has been satisfactorily completed.	This term may only be used where: <ul style="list-style-type: none"> audit elements have a finite period of application (e.g. construction activities, development of a document); the action has been satisfactorily completed; and the DWER has provided written acceptance of 'completed' status for the audit element.
Not required at this stage	NR	The requirements of the audit element were not triggered during the reporting period.	This should be consistent with the 'Phase' column of the audit table.
Potentially Non-compliant	PNC	Possible or likely failure to meet the requirements of the audit element.	This term may apply where during the reporting period the proponent has identified a potential non-compliance and has not yet finalized its investigations to determine whether non-compliance has occurred.
Non-compliant	NC	Implementation of the proposal has not been carried out in accordance with the requirements of the audit element.	This term applies where the requirements of the audit element are not "complete" have not been met during the reporting period.
In Process	IP	Where an audit element requires a management or monitoring plan be submitted to the DWER or another government agency for approval, that submission has been made and no further information or changes have been requested by the DWER or the other government agency and assessment by the DWER or other government agency for approval is still pending.	<p>The term 'In Process' may not be used for any purpose other than that stated in the Definition Column.</p> <p>The term 'In Process' may not be used to describe the compliance status of an implementation condition and/or procedure that requires implementation throughout the life of the project (e.g. implementation of a management plan).</p>

Note:

- Phases that apply in this table = Pre-Construction, Construction, Operation, Decommissioning, Overall (several phases).
- This audit table is a summary of the requirements applying to this proposal. Refer to the Statement issued for the proposal under Part IV of the EP Act for details/precise wording of audit elements.
- Code prefixes: M = Minister's condition, P = Proponent's commitment, N = Procedure.
- Abbreviations: CAR = Compliance Assessment Report; CEO = Chief Executive Officer of EPA Services; Minister for Env = Minister for the Environment; EPA Services = Department of Water and Environmental Protection, Environmental Protection Authority – Services; APIM = API Management Pty Ltd, DoF = Department of Fisheries, now Department of Primary Industry and Regional Development – Fisheries; DEC = Department of Environment and Conservation, now Department of Biodiversity, Conservation and Attractions (DBCA).
- Compliance Status: C = Compliant, CLD = Completed, NC = Non – compliant, NR = Not Required at this stage. Please note the terms NA = Not Audited and VR = Verification Required are only for EPA Services use. IP = In Process may only be used by the proponent in circumstances outlined in Section 2.8 of the *Post Assessment Guideline for Preparing an Audit Table*.

Mid-term, Post-development and second Post-development survey reports.	Overall	Within four months of having completed each survey.	NR	
930:M11.1	Coastal Processes	The proponent shall ensure that design, construction and operation of the nearshore marine facilities (as defined in Schedule 1) achieve the following outcomes as far as is reasonably practicable as measured under a Coastal Habitat Management Plan approved by condition 11-2: <ul style="list-style-type: none"> i. minimise change to littoral sediment transport; ii. maintain the natural tidal regime within Bouguer Passage; and iii. maintain beach and dune integrity for turtle nesting purposes at all turtle nesting beaches potentially affected by the construction and operation of nearshore marine facilities, other than at Anketell Point (Figure 6). 	Implement monitoring and management actions in accordance with approved Coastal Habitat Management Plan (CHMP) to ensure operation of nearshore marine facilities are in accordance with condition 11-1	Monitoring and survey reports.	Overall	On-going.	NR	
930:M11.2	Coastal Processes	Prior to construction activities, the proponent shall revise the Coastal Habitat Management Plan (November 2010, Rev0) in consultation with the DEC to be approved by the CEO. The plan shall include: <ul style="list-style-type: none"> i. beach profiles at Anketell Point using on-ground surveys which monitor beach width and slope, particle grain size, and records significant inflection points and features 	Revision of CHMP in consultation with DEC to be approved by the CEO.	Approved CHMP Correspondence register.	Pre-construction	Prior to construction activities.	CLD	CHMP, and summary of consultation, submitted to the CEO on 20 January 2015. Approved 19 March 2015.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		<ul style="list-style-type: none"> including primary dune, vegetation line, scarp, high tide mark, water line; ii. tracking changes in sediment distribution and type within the near-shore area of Anketell Point and Bouguer Passage; iii. management triggers relevant to achieving the outcomes specified in condition 11-1; iv. management measures that will be implemented in the event that management triggers are likely to be exceeded; and v. a community liaison strategy to obtain feedback on impacts on recreational values. 						
930:M11.3	Coastal Processes	The proponent shall implement the approved Coastal Habitat Management Plan referred to in condition 11-2.	Implement approved CHMP.	Monitoring reports. Compliance Assessment Reports.	Overall	Ongoing.	NR	
930:M11.4	Coastal Processes	The proponent shall report any non-achievement of the management trigger referred to in condition 11-2, along with measures taken and/or proposed to be taken, and strategies to be implemented in response to the non-achievement, to the CEO within 21 days of the non-achievement being identified.	Coastal Processes 21 Day Potential Non-Compliance Report Template.	Correspondence register	Overall	Within 21 days of the non-achievement being identified. Ongoing.	NR	
930:M11.5	Coastal Processes	The proponent shall make the Plan required under condition 11-2 publicly available in a manner approved by the CEO.	CHMP uploaded to website, or otherwise published in accordance with CEO approval.	Screenshot of website.	Overall	Within 7 days of receiving a request to do so.	NR	
930:M12.1	Artificial Light Management – marine turtles	At all stages of the proposal including construction, operations and decommissioning, the proponent shall ensure that, other than at Anketell Point, all turtle nesting beaches as shown in Figure 6 are maintained in the shade at ground level or not subject to direct light exceeding 0.01 lux (± 0.005 lux accuracy) from Port infrastructure or activities during the turtle nesting and hatching seasons defined as October to March in any year.	Implement light monitoring and management in accordance with approved Light Management Plan (LMP).	Monitoring reports. Compliance Assessment Reports.	Overall	October to March in any year. Ongoing.	NR	
930:M12.2	Artificial Light Management – marine turtles	<p>The proponent shall develop, to the satisfaction of the CEO, and implement a Light Management Plan that includes marine turtle mitigation measures for avoidance, minimisation, monitoring and adaptive management for artificial light stressors during construction and operation of the proposal. This Plan must include the following Objectives:</p> <ol style="list-style-type: none"> 1. address the long-term management of marine turtles that utilise the beaches identified in Figure 6 and other nesting beaches and waters where there are proposal related stressors; 2. establish a monitoring program to measure and detect changes to marine turtle populations that are potentially affected by artificial light related stressors; and 	Implement approved LMP.	Approved LMP Monitoring reports Compliance Assessment Reports.	Overall	Ongoing.	CLD	Light Management Plan submitted to the CEO on 26 June 2014 and approved on 4 September 2014.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		3. specify design features, management measures and operational controls to manage and where practicable, avoid adverse impacts on marine turtles with specific reference to reducing impacts from artificial light.						
930:M12.3	Artificial Light Management – marine turtles	<p>The Light Management Plan required under condition 12-2 shall include the following:</p> <ol style="list-style-type: none"> 1. report the baseline information on the population(s) of marine turtles that utilise habitats within and adjacent to the Anketell Point including those habitats identified in Figure 6, Delambre Island and Legendre Island and waters where there are proposal related light stressors; 2. identify the sources and location(s) of project related light stressors with the potential to cause adverse impacts on marine turtles; 3. define a monitoring program to measure and detect changes to marine turtle populations from artificial light; 4. specify design features, management measures and operating controls to manage artificial light, with the aim to avoid impacts on marine turtles, which include (but are not limited to): <ol style="list-style-type: none"> a. shrouding of lights or directional shading on marine and coastal infrastructure, ships and other vessels related to construction activities; b. marine vessel holding areas that aim to concentrate light effects from shipping in areas that will minimise light impacts on turtle nesting beaches and anchor damage in foraging habitats; c. low intensity and low elevation lighting; and d. motion sensors and timer devices; 5. annual audits and reviews of the effectiveness of lighting design features, management measures and operational controls; 6. performance indicators against which the achievement of the objectives of the Plan and the effectiveness of mitigation measures can be determined; 7. contingency management response should monitoring of performance indicators indicate that the objectives of the Plan are not being met; and 8. protocols to detect, rescue and release adult and hatchling turtles that are or have been miss-orientated or disorientated by artificial light attributed to the proposal. 	Preparation of LMP in accordance with Condition 12.3	Approved LMP	Pre-construction	Ongoing	CLD	Light Management Plan approved by the CEO on 4 September 2014.
930:M12.4	Artificial Light Management – marine turtles	The proponent shall report any harm, injury or mortality of marine turtles or other threatened or specially protected fauna to the DEC within 24 hours following detection.	Marine Fauna 24 hour Incident Report Template	Correspondence register	Overall	Within 24 hours following detection. Ongoing	NR	

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
930:M13.1	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	The proponent shall engage dedicated Marine Fauna Observers who must: <ol style="list-style-type: none"> 1. demonstrate a knowledge of marine wildlife species in the Pilbara region, including Threatened and Migratory Species listed under the <i>Environment Protection and Biodiversity Conservation Act 1999</i>, Wildlife Conservation (Specially Protected Fauna) Notice 2012), <i>Fish Resources Management Act 1994</i> and DEC priority listed species, and their behaviours; 2. have the capacity, subject to safety considerations, to move and make observations and other relevant records independently within the vicinity of marine construction activities (including pile driving and dredging); 3. be on duty during all daylight hours when pile-driving and/or dredging operations are conducted; and 4. maintain a log of: <ol style="list-style-type: none"> a. observations of cetaceans in a format consistent with the National Cetacean Sightings and Strandings Database; b. observations of marine fauna, including injured or dead fauna within 500 metres of the marine construction activities referred to in condition 13-1(2); c. observations of fauna behaviour, in particular any behaviour that could be interpreted as a display of disturbance or distress; d. management response by the proponent in relation to observation of disturbed or distressed fauna, and injured or dead fauna; and e. observation hours in relation to the duration of the pile driving and dredge activity. 	Engage suitably trained Marine Fauna Observers in accordance with condition 13-1	Personnel Training Register (available on request) Marine Fauna Observation logs Compliance Assessment Reports	Overall	Ongoing	NR	
930:M13.2	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	The proponent shall within six months of completing pile driving operations, lodge cetacean records with the National Cetacean Sighting and Strandings Database at the Australian Antarctic Division and with the DEC.	Lodge cetacean records with the National Cetacean and Strandings Database (AAD) and DEC	Correspondence register Data transmittal	Overall	Within 6 months of completing pile driving operations.	NR	
930:M13.3	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	At least one member of the crew on each vessel undertaking construction activities (dredge, piling vessels) will be trained in marine fauna observations and mitigation measures, including the requirements of the Wildlife Conservation (Closed Season for Marine Mammals) Notice 1998, as amended or replaced from time to time, and maintain a watch and a log of fauna observed during transit and construction activity consisting of Global Positioning System coordinates, species (if known), and behaviour.	Trained crew on each construction vessel to maintain watch and keep log of fauna observed in accordance with condition 13-3.	Marine Fauna Observation logs Training records available on request	Construction	During marine construction activities.	NR	

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
930:M13.4	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	Logs required under condition 13-3 are to be submitted to the DEC on an annual basis at the same time as submitting the compliance assessment report required by condition 4-6.	Marine fauna observation logs submitted to DEC.	Correspondence register Data transmittal.	Construction	By 30 April annually.	NR	
930:M13.5	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	Vessels engaged in construction of the nearshore or offshore marine facilities shall not exceed those speeds specified in the Marine Fauna Management Plan required under condition 13-12 or a speed designated by the Department of Transport or relevant Port Authority, whichever is lesser.	Construction vessels to adhere to nominated speed limits.	Vessel logs	Construction	Ongoing during construction activities.	NR	
930:M13.6	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	No marine pile driving operations shall commence until the Marine Fauna Observer (or observers) required by condition 13-1 have verified that no cetacean(s) or dugong(s) have been observed within a radius of 1,500 metres or marine turtles within a radius of 300 metres from piling operations during the 20 minute period immediately prior to commencement of piling operations.	Implement piling management protocol in accordance with Condition 13.6.	Marine Fauna Observation logs.	Construction	Within 20 minutes prior to commencement of piling operations.	NR	
930:M13.7	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	Prior to commencement of full power marine pile driving, the proponent shall implement soft start-up procedures that slowly increase the intensity of noise emissions over a period of no less than 15 minutes.	Implement soft start piling management protocol in accordance with Condition 13.7.	Marine Fauna Observation logs.	Construction	Prior to commencement of full power marine pile driving	NR	
930:M13.8	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	If the Marine Fauna Observer(s) required by condition 13-1, or any other person, observes a marine turtle enter within 100 metres of a piling operation, or cetacean or dugong within 500 metres of a piling operation, that piling operation is to be suspended.	Suspension of piling operations in the event that a marine turtle or cetacean enters the suspension zone.	Marine Fauna Observation logs	Construction	Immediately following observation.	NR	
930:M13.9	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	Marine pile driving that has been suspended in accordance with condition 13-8 shall not recommence until the cetacean or dugong has moved beyond 1,500 metres from the suspended piling operation or the marine turtle beyond 300 metres of their own accord, or the cetacean, dugong or marine turtle has not been observed within the exclusion zone for a period of 30 minutes. Marine pile driving that has been suspended for more than 15 minutes shall recommence with soft start-up procedures as required by condition 13-7.	Suspended piling operations not to recommence until marine turtle or cetacean has exited exclusion zone or has not been observed for 30 minutes.	Marine Fauna Observation logs	Construction	Upon cetacean or dugong moving beyond 1,500 metres from piling operations or marine turtle moving beyond 300 metres, or cetacean, dugong or marine turtle has not been observed within the exclusion zone for a period of 30 minutes.	NR	
930:M13.10	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	No pile-driving shall occur between the hours of sunset and sunrise during: 1. the turtle nesting season defined as 20 October to 10 March in any year; or 2. the peak southern migration of mother and calf humpback whale pods defined as 1 September to 31 October in any year.	No piling to occur between sunrise and sunset during the turtle nesting season or peak of the southern humpback whale migration (as defined in Condition 13-10)	Marine Fauna Observation logs	Construction	No pile-driving between the hours of sunset and sunrise during 20 October to 10 March and 1 September to 31 October in any year.	NR	
930:M13.11	Marine Fauna Interaction – Marine Pile Driving,	Except during periods specified in 13-10(1) and (2) marine pile driving commenced prior to sunset can continue between the hours	Piling commenced prior to sunset may continue	Marine Fauna Observation logs	Construction	Except in time periods specified in 13-10, and	NR	

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
	Dredging and Marine Construction Vessels	of sunset and sunrise, unless marine pile driving is suspended for more than 15 minutes.	except during the turtle nesting or peak southern humpback whale migration periods, or following a suspension of greater than 15 minutes			if pile driving has been suspended for more than 15 minutes		
930:M13.12	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	<p>Prior to the commencement of construction and/or dredging and dredge spoil disposal activities, unless otherwise approved by the CEO, the proponent shall revise the <i>Marine Fauna Management Plan (December 2010, Rev 2)</i>, in consultation with the DEC to the satisfaction of the CEO. The objective of this Marine Fauna Management Plan is to ensure that the proponent constructs and operates the proposal so as to:</p> <ol style="list-style-type: none"> 1. detect, avoid, or where this is not practicable, mitigate, impacts upon conservation significant marine fauna, from construction and operation of the proposal; 2. measure underwater noise from pile driving operations to establish a library of sound signals: <ol style="list-style-type: none"> a. at varying distances from the noise source; b. when driving piles of different sizes and types; c. during the concurrent piling of different numbers of piles; d. in conditions of different water depths; and e. in different driving conditions (substrate types); 3. review the predictive capacity of the noise propagation model used for the pile driving and make recommendations for improving the current management measures outlined in condition 13-1 and the accuracy of underwater noise modelling for future underwater noise assessments; 4. include the following marine turtle monitoring and management elements: <ol style="list-style-type: none"> a. design features and operating procedures that will be used to minimise, as far as reasonably practicable, adverse impacts on marine turtles from dredging and spoil disposal activities; b. operating procedures that will be used to detect, record and report to the DEC injury or mortality to listed marine turtles from dredging or spoil disposal and activities; c. performance standards against which achievement of the objectives of this condition can be determined; and d. management triggers and management responses; 	Revision of MFMP in consultation with DEC to the requirements of Condition 13.12	Approved MFMP	Pre-construction	Prior to the commencement of construction and/or dredging and dredge spoil disposal activities, unless otherwise approved by the CEO.	CLD	Final MFMP, and summary of consultation, submitted to the CEO on 31 October 2014. Final MFMP approved by the CEO on 5 December 2014.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		5. the proponent shall include the following in the Marine Fauna Management Plan required under condition 13-12: <ol style="list-style-type: none"> a. description of the environmental stressors relating to the construction and operation of the marine components of the proposal which are likely to impact on conservation significant marine fauna. (environmental stressors may include, but are not limited to, noise, vibration, light spill and glow, vessel movements and strikes, dredge entrainment, and changes to coastal processes and water quality with the potential to impact on important marine fauna habitats); b. a description of design features and management actions which the proponent will implement to avoid, or where this is not practicable, mitigate impacts of the environmental stressors relating to the construction and operation of the marine components of the proposal on conservation significant marine fauna; and c. environmental performance standards to determine whether the design features and management actions are achieving the plan objectives referred to in condition 13-12. 						
930:M13.13	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	The proponent shall implement the approved Marine Fauna Management required under condition 13-12.	Implementation of approved MFMP	Monitoring reports Compliance Assessment Reports	Overall	Ongoing.	NR	
930:M13.14	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	The proponent shall make the Marine Fauna Management Plan approved pursuant to condition 13-12 publicly available in a manner approved by the CEO.	MFMP uploaded to website, or otherwise published in accordance with CEO approval	Screenshot of website	Overall	Within 7 days of receiving a request to do so.	NR	
930:M13.15	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	The proponent shall review biannually the approved Marine Fauna Management Plan.	Bi-annual review of MFMP	Compliance Assessment Reports Review history within MFMP	Overall	Biannually.	NR	
930:M13.16	Marine Fauna Interaction – Marine Pile Driving, Dredging and Marine Construction Vessels	The proponent shall report to: <ol style="list-style-type: none"> 1. the CEO any non-achievement of the environmental performance standards referred to in condition 13-12 5 c and its recommendations for how the plan should be amended to ensure standards are achieved within 21 days of it having determined non-achievement; and 	Marine Fauna 21 Day Potential Non-Compliance Report Template Marine Fauna 24 hour Incident Report Template	Correspondence register Compliance Assessment Reports	Overall	Report to the CEO within 21 days of determining non-achievement. 		2. the DEC any natural or proposal attributable injury or mortality of conservation significant marine fauna within 24 hours of the observation.				injury or mortality of conservation significant marine fauna.		
930:M14.1	Operational Marine Environmental Quality	Prior to the completion of the construction of marine infrastructure described in the approved Marine Infrastructure Plan, and prior to the commencement of the shipment of product from the Port, the proponent must finalise a Port Operations Marine Environmental Monitoring and Management Plan in liaison with the Dampier Port Authority and approved by the CEO, and provide any spatial data in a format compatible with a GIS acceptable to the CEO.	Finalise Port Operations Marine Environmental Monitoring and Management Plan (POMEMMP) in consultation with the DPA to the satisfaction of the CEO Submit spatial data in GIS compatible format specified by the CEO	Final POMEMMP Data transmittal	Construction	Prior to completion of marine infrastructure and prior to the commencement of the shipment of product from the port.	NR	
930:M14.2	Operational Marine Environmental Quality	The objectives of the Port Operations Marine Environmental Monitoring and Management Plan will be to ensure that Port operational (e.g. discharges, ship movements, etc) and maintenance (e.g. dredging) activities are managed to achieve the following marine environmental protection outcomes: i. achievement of the environmental quality objectives and levels of ecological protection defined through condition 14-3(i) and described in Schedule 3 and shown in Figure 7; and ii. no detectible net negative change to benthic habitats relative to the baseline state of those habitats, outside of the Zones of High Impact, shown in Figures 4 and 5 and defined in Tables 3 of Schedule 1.	Preparation of POMEMMP in accordance with Condition 14.2	Approved POMEMMP	Overall	Ongoing.	NR	
930:M14.3	Operational Marine Environmental Quality	The Port Operations Marine Environmental Monitoring and Management Plan shall include: i. Map(s) spatially representing the Zone of high impact, the environmental quality objectives to be achieved and the levels of ecological protection referred to below consistent with Schedule 3: a. Moderate Ecological Protection Area(s) (MEPA) defined as the area contained within 250 metres of the shipping berths and ship turning basin, and the area enclosed by the Marine Offloading Facility breakwaters; and b. a High Ecological Protection Area (HEPA) outside of the Moderate Ecological Protection Area, including the Shipping Channel; Note: Schedule 3 describes Environmental Quality Objectives and associated Levels of Ecological Protection and provides guidance on allowable levels of change and appropriate guidance on trigger values.	Preparation of POMEMMP in accordance with Condition 14.3	Approved POMEMMP	Overall	Ongoing.	NR	

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
		<ul style="list-style-type: none"> ii. description of how the Port Operations Marine Environmental Monitoring and Management Plan complements and links with the Coastal Habitat Management Plan and the Marine Fauna Management Plan; iii. descriptions of the port operational and maintenance activities that could significantly impact the marine environment and the impact and reference monitoring sites relevant to these activities, including key physical attributes, geographic locations and measures of the baseline condition of benthic communities to be monitored; iv. descriptions of the environmental indicators to be monitored (physical, chemical and biological) and the environmental quality guidelines and standards that will be used in a risk-based tiered approach for assessing environmental performance against the environmental protection outcomes set in condition 14-2; v. the monitoring methodologies to be applied to measure the relevant environmental indicators; vi. the timing and frequency for monitoring the relevant environmental indicators at the different impact and reference sites to inform adaptive management of the identified port activities; vii. the monitoring and data evaluation procedures to be applied so as to assess achievement of the environmental protection outcomes set in condition 14-2; viii. management actions that will be implemented in the event that the management triggers values for each tier set in condition 14-3(iv) are not met; ix. a requirement for all port-related operational and maintenance activities and wastewater discharges to be managed with the objective of achieving the environmental protection outcomes established in condition 14-2; and x. a regular environmental performance monitoring and reporting schedule, including any contingency measures required to ensure achievement of the environmental quality objectives. 						
930:M14.4	Operational Marine Environmental Quality	The proponent must only discharge wastewater to the marine environment through purpose-built outfalls.	No wastewater discharges beyond purpose-built outfalls	Compliance Assessment Reports	Overall	Ongoing.	NR	
930:M14.5	Operational Marine Environmental Quality	Wastewater treatment and wastewater discharge infrastructure must comply with contemporary best practice principles including modelling based on a specific port design, diffuser performance, effluent characteristics and toxicity, ambient water quality conditions and specific mitigation measures.	Best practice principles, modelling of initial dilution and toxicity and ambient conditions to inform wastewater discharge design	Works approval documentation	Overall	Ongoing.	NR	

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
930:M14.6	Operational Marine Environmental Quality	The proponent shall implement the approved Port Operations Marine Environmental Monitoring and Management Plan required under condition 14-1 prior to the commencement of the shipment of product from the Port.	Implement approved POMEMMP prior to first shipment of product	Monitoring reports Compliance Assessment Reports	Overall	Prior to commencement of the shipment of product from the port. Ongoing.	NR	
930:M14.7	Operational Marine Environmental Quality	In the event that monitoring carried out under the approved Port Operations Marine Environmental Monitoring and Management Plan determines that any of the environmental protection outcomes set in condition 14-2 are not being achieved, the proponent shall report the findings to the CEO as soon as practicable, but within five working days, along with a description of the management actions to be taken to meet the required level of environmental quality.	Reporting of non-achievement of EPOs to CEO as soon as practicable, but within 5 working days	Compliance Assessment Reports Non-compliance reporting	Overall	As soon as practicable within 5 working days. Ongoing	NR	
930:M15.1	Introduced Marine Pests	The proponent shall manage non-trading vessel activities and immersible equipment activities whilst engaged for the construction, operation, maintenance and decommissioning of the proposal so as to prevent the introduction of Introduced Marine Pests into State waters.	Implement approved Introduced Marine Pest Risk Assessment	Completed Risk Assessments Compliance Assessment Reports	Overall	Ongoing.	NR	
930:M15.2	Introduced Marine Pests	Prior to any non-trading vessels or immersible equipment entering the Port Area, the proponent shall prepare an Introduced Marine Pest Risk Assessment Procedure to the satisfaction of the CEO in consultation with the DPIRD - Fisheries which includes but is not limited to the following: i. all factors to be considered in the risk assessment; ii. limits for unacceptable risk of introducing an Introduced Marine Pest; iii. a tool for performing Introduced Marine Pest Risk Assessments; and iv. measures to be implemented to reduce risks to an acceptable level, where the risk assessment identifies an unacceptable risk.	Preparation of Introduced Marine Pest Risk Assessment Procedure in consultation with DPIRD-Fisheries to the satisfaction of the CEO	Approved Introduced Marine Pest Risk Assessment Procedure	Pre-Construction	Prior to any non-trading vessels or immersible equipment entering the Port area. Ongoing	NR	
930:M15.3	Introduced Marine Pests	The proponent shall ensure that any non-trading vessels or immersible equipment are subject to an Introduced Marine Pest Risk Assessment, prior to entering or demobilising from the Port Area, in accordance with the Introduced Marine Pest Risk Assessment Procedure approved pursuant to condition 15-2.	All non-trading vessels and immersible equipment subject to Introduced Marine Pest Risk Assessment	Completed Risk Assessments Log of vessel movements into/out of Port Area Compliance Assessment Reports	Overall	Prior to entering or demobilising from the Port area. Ongoing	NR	
930:M15.4	Introduced Marine Pests	The proponent shall ensure that any Introduced Marine Pest Risk Assessment undertaken pursuant to condition 15-3 is recorded and that record is provided to the DPIRD - Fisheries within seven days of the Introduced Marine Pest Risk Assessment being undertaken.	Record all Introduced Marine Pest Risk Assessments and provide records to DPIRD - Fisheries within seven days	Completed Risk Assessments Correspondence register	Overall	Submitted to the DPIRD-Fisheries within 7 days of the Introduced Marine Pest Risk Assessment being undertaken. Ongoing	NR	

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
930:M15.5	Introduced Marine Pests	The proponent shall ensure that any non-trading vessel or immersible equipment that poses an unacceptable risk, as defined by the limits identified under condition 15-2ii, of introducing Introduced Marine Pests, as determined by an Introduced Marine Pest Risk Assessment undertaken pursuant to condition 15-3, does not enter the Port Area.	Implement approved Introduced Marine Pest Risk Assessment including measures to reduce risks to acceptable levels	Completed Risk Assessments Vessel logs	Overall	Ongoing.	NR	
930:M15.6	Introduced Marine Pests	Prior to any non-trading vessels or immersible equipment entering the Port Area, the proponent shall prepare an Introduced Marine Pests Monitoring Program to the satisfaction of the CEO in consultation with the DPIRD-Fisheries that: <ul style="list-style-type: none"> i. is consistent with monitoring design, implementation and reporting standards as set out in the <i>National System for the Prevention and Management of Marine Pest Incursions (Marine Intergovernmental Agreement, April 2005)</i>; ii. includes a minimum monitoring frequency of once every two years and/or consistent with the <i>National System for the Prevention and Management of Marine Pest Incursions (Marine Intergovernmental Agreement, April 2005)</i>; and iii. requires opportunistic sampling and analysis of specimens removed during port, vessel and immersible equipment monitoring activities. 	Prepare Introduced Marine Pests Monitoring Program (IMPMP) in consultation with DPIRD-Fisheries to the satisfaction of the CEO	Approved IMPMP	Pre-construction	Prior to any non-trading vessels or immersible equipment entering the Port area. Ongoing	CLD	IMPMP approved by the DPIRD-Fisheries 4 February 2014. Submitted to EPA Services 11 February 2014. Approved by CEO EPA Services 9 April 2014.
930:M15.7	Introduced Marine Pests	The proponent shall implement the Introduced Marine Pests Monitoring Program approved pursuant to condition 15-6, or amended versions approved by the CEO for the life of the proposal, prior to any entry to the Port Area by a non-trading vessel or immersible equipment.	Implementation of approved IMPMP prior to commencement of marine construction	Monitoring reports Compliance reports	Overall	Prior to any entry to the Port area by a non-trading vessel or immersible equipment. Ongoing	NR	
930:M15.8	Introduced Marine Pests	The proponent shall provide the results of monitoring undertaken pursuant to condition 15-7 to the CEO and the DPIRD-Fisheries annually.	Annual reporting of monitoring results to CEO and DPIRD-Fisheries	Monitoring reports Correspondence register	Overall	To the CEO and the DPIRD-Fisheries annually. Ongoing	NR	
930:M15.9	Introduced Marine Pests	Prior to any non-trading vessel or immersible equipment entering the Port Area, the proponent shall prepare an Introduced Marine Pest Management Strategy to the satisfaction of the CEO in consultation with the DPIRD-Fisheries, to prevent wherever practicable, the establishment and proliferation of any Introduced Marine Pest, aiming to control and potentially eradicate that Introduced Marine Pest, and to minimise the risk of that Introduced Marine Pest being transferred to other locations within Western Australia.	Prepare Introduced Marine Pest Management Strategy in consultation with DPIRD-Fisheries to the satisfaction of the CEO	Approved Introduced Marine Pest Management Strategy	Pre-construction	Prior to any non-trading vessel or immersible equipment entering the Port area. Ongoing	C	Introduced Marine Pest Management Strategy submitted to the DPIRD-Fisheries for review on 9 January 2015. Feedback received DoF 17 August 2015; document remains in a pre-finalisation status.
930:M15.10	Introduced Marine Pests	The proponent shall notify the CEO, DPIRD-Fisheries and any relevant Port Authority: <ul style="list-style-type: none"> i. within 24 hours following initial detection of a suspected Introduced Marine Pest; and ii. within 24 hours following subsequent analysis and confirmation of species identification of the suspected Introduced Marine Pest. 	IMP 24-hour Incident Report Template Notify CEO, DPIRD-Fisheries and relevant port authority within 24 hours of confirmation of species identification	Correspondence register	Overall	Notify the CEO, DPIRD-Fisheries and relevant Port Authority within 24 hours of initial detection and subsequent analysis and confirmation of	NR

						suspected Introduced Marine Pests. Ongoing		
930:M15.11	Introduced Marine Pests	In the event that any Introduced Marine Pests are suspected or detected, the proponent shall, in consultation with the DPIRD-Fisheries and the CEO implement the Introduced Marine Pests Management Strategy.	Implement Marine Pests Management Strategy	Correspondence register	Overall	Ongoing.	NR	
930:M15.12	Introduced Marine Pests	The proponent is to submit a report detailing the outcomes of any implementation of the Introduced Marine Pests Management Strategy to the DPIRD-Fisheries and the CEO within 30 days of the commencement of the implementation of the Introduced Marine Pests Management Strategy (IMPMS) and thereafter as required by the CEO in consultation with the DPIRD-Fisheries.	Submit Marine Pests Management Strategy implementation report to the CEO, DPIRD-Fisheries within 30 days	Marine Pests Management Strategy implementation report Correspondence register	Overall	Within 30 days of the commencement of the implementation of the IMPMS. Ongoing	NR	
930:M16.1	Decommissioning	At least six months prior to the anticipated date of closure, the proponent shall prepare a decommissioning plan that meets the following decommissioning criteria, subject to the approval of the CEO: <ol style="list-style-type: none"> 1. removal or, if agreed in writing by the appropriate regulatory authority, retention of plant and infrastructure agreed in consultation with relevant stakeholders; 2. rehabilitation of all disturbed areas to a standard suitable for the new land use(s) as agreed pursuant to the consultation referred to in condition 16-1(1); and 3. identification of contaminated areas, including provision of evidence of notification and proposed management measures to relevant statutory authorities. 	Prepare Decommissioning Plan in accordance with Condition 16.1 to be approved by the CEO	Approved Decommissioning Plan	Overall	At least six months prior to the anticipated date of closure.	NR	
930:M17.1	Consultation with Relevant Stakeholders	The Proponent shall provide evidence to the CEO that relevant stakeholders, including Traditional owners, have been consulted about the terrestrial facilities and disturbance footprint; been given a reasonable opportunity to comment and how their comments have been addressed.	Reporting of consultation, including outcomes, to CEO	Correspondence register Workshop or meeting records	Pre-construction	Prior to construction.	NR	
930:M17.2	Consultation with Relevant Stakeholders	The proponent shall consult with the relevant stakeholders as appropriate regarding plans and programs required by other conditions in this Statement as agreed by the CEO prior to endorsement of each plan or program by the CEO and prior to implementation of each plan or program.	Consultation with relevant stakeholders regarding plans and programs	Correspondence register Draft plans and programs including summary of consultation Approved plans and programmes	Overall	Prior to CEO endorsement of each plan or program and prior to the implementation of each plan or program.	C	Summary of stakeholder consultation, undertaken in accordance with approved Stakeholder Consultation Plan (approved by CEO on 24 June 2013), submitted alongside plans and programs prior to the CEO's endorsement of each plan or programme.

Audit Code	Subject	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
930:M18.1	Staging of Plans	Where a plan, program, report or survey is required by the implementation conditions of this Statement to be prepared and approved prior to the commencement of an activity, it is required that the plan, strategy, report or survey can be prepared and approved as per the relevant condition requirements for a component or stage of the activity, allowing staged implementation.	Preparation of each plan, program, report or survey in accordance with relevant condition(s) to allow staged implementation as required.	Approved plan, program, report or survey	Overall	Ongoing.	C	
930:M19.1	Review of Plans	If the proponent amends any plan, program, report or strategy or other document required by the implementation conditions of this Statement, the proponent must implement the amended plan from the date of the amendment.	Implement most recent version of any plan, program, report or strategy	Correspondence register Compliance Assessment Reports Approved plans and programmes	Overall	Ongoing.	NR	
930:M19.2	Review of Plans	If any plan, program, report or strategy is required to be to the satisfaction of the CEO under the implementation conditions of this Statement, the proponent may only make a significant amendment to the plan, program, report or strategy if the amendment is acknowledged by the CEO in writing as being to the CEO's satisfaction. Significant amendments are those amendments which alter the obligations of the proponent, that is, are not minor or administrative.	Approval of significant document amendment(s) by CEO	Approved plans and programmes Correspondence register	Overall	Ongoing.	NR	
930:M20.1	Residual impact and risk management measures	In order to mitigate for significant residual impacts and risks (permanent and temporary) of the proposal to marine benthic habitat, mangroves, significant marine and terrestrial fauna, the proponent shall undertake the following residual impact and risk management measures, consistent with financial, governance and accountability arrangements described in Schedule 4 (proponent residual impact and risk management measures – Anketell Point Port Development), unless otherwise agreed with the CEO.	Undertake residual impact and risk management measures as detailed in Schedule 4	Funding plans Correspondence register	Overall	Ongoing.	NR	
930:M20.2	Residual impact and risk management measures	The proponent will contribute funds to relevant scientific research, on the basis described in Schedule 4 (Project A). The aim of the project is to add to the understanding and management of the impacts and risks to conservation significant marine fauna (i.e. whales, dugongs, dolphins, sea turtles) from marine and coastal development in the Pilbara region. Within the timeframe specified in Schedule 4, unless otherwise approved by the CEO, the proponent, in consultation with the DEC, will submit a plan to fund relevant research, for approval by the CEO.	Submit funding plan, in consultation with DEC, for approval by the CEO.	Correspondence register	Overall	Submit a plan to fund relevant research at least 18 months prior to port marine infrastructure construction commencing or otherwise approved by the CEO.	NR	Recommendation of engagement with DBCA in 2023. Aim to progress Memorandum of Understanding (MoU) with DBCA - yet to be completed.
930:M20.3	Residual impact and risk management measures	The proponent will fund studies to improve the understanding of impact of marine noise on marine mammal behaviour, on the basis described in Schedule 4 (Project B). The aim of the project is to add to the understanding and management of the impacts of noise from marine construction activities on marine mammal behaviour. At least six months prior to port marine infrastructure construction commencing or unless otherwise approved by the CEO, the proponent will submit a plan to fund relevant research.	Submit funding plan at least six months prior to port marine infrastructure construction commencing	Funding plan Correspondence register	Pre-construction	Submit a plan to fund relevant research at least 6 months prior to port marine infrastructure construction commencing or otherwise approved by the CEO.	NR	Recommendation of engagement with DBCA in 2023. Aim to progress Memorandum of Understanding (MoU) with DBCA - yet to be completed.

930:M20.4	Residual impact and risk management measures	The proponent will contribute to the Western Australian Marine Science Institution (WAMSI) Dredging Science Node, on the basis described in Schedule 4 (Project C). The aim of the project is to enhance the capacity of Government and the private sector to predict and manage the environmental impacts of dredging on tropical marine communities in Western Australia. Within the timeframe specified in Schedule 4 or unless otherwise approved by the CEO, the proponent will enter into a contract with the Centre Agent for WAMSI to fund the Dredging Science Node.	Contract with WAMSI to fund Dredging Science Node	Contract Correspondence register	Overall	Commencing at least 6 months prior to port marine infrastructure construction commencing or otherwise approved by the CEO.	NR	Funding Agreement to be reviewed with WAMSI based on draft Agreement considered in November 2014.
930:M20.5	Residual impact and risk management measures	The proponent will contribute to management and recovery and research for the <i>Wildlife Conservation (Specially Protected Fauna) Notice 2012</i> Schedule 1 species <i>Lerista neviniae</i> , on the basis described in Schedule 4 (Project D). The aim of the project is to provide for active management and recovery and to improve understanding of the ecology, population genetics and habitat requirements of the species. Within the timeframe specified in Schedule 4, or otherwise approved by the CEO, the proponent will submit a plan to fund relevant research developed in consultation with DEC for the approval of the CEO.	Submit funding plan, in consultation with DEC, for approval by the CEO.	Funding plan Correspondence register	Overall	Commencing at least 6 months prior to port marine infrastructure construction commencing or otherwise approved by the CEO.	NR	<i>Lerista neviniae</i> now Endangered under the <i>Biodiversity Conservation Act 2016 (Wildlife Conservation [Specially Protected Fauna] Notice 2018, Schedule 2)</i> . Recommended engagement with DBCA in 2023. Aim to progress Memorandum of Understanding (MoU) with DBCA – yet to be completed.
930:M20.6	Residual impact and risk management measures	The proponent will contribute to management of Dixon Island, on the basis described in Schedule 4 (Project E). The aim of the project is to improve conservation outcomes on Dixon Island. At least six months prior to port marine infrastructure construction commencing or unless otherwise approved by the CEO, the proponent will submit a plan to fund relevant management activities developed in consultation with DEC.	Submit funding plan, in consultation with DEC, at least six months prior to port marine infrastructure construction commencing	Correspondence register	Overall	Commencing at least 6 months prior to port marine infrastructure construction commencing or otherwise approved by the CEO.	NR	Recommendation of engagement with DBCA in 2023. Aim to progress Memorandum of Understanding (MoU) with DBCA – yet to be completed.
930:M20.7	Residual impact and risk management measures	The proponent shall make publicly available, in a manner approved by the CEO, all conservation and research outcomes from Projects A, B, C, D and E.	Conservation and research outcomes from Projects A, B, C, D and E uploaded to APIM website or published within peer reviewed literature	Screenshot of website Correspondence register	Overall	Within 7 days of being requested to do so.	NR	
930:M20.8	Residual impact and risk management measures	The CEO may approve redirection of all or part of the financial contributions from Projects A, B, C, D or E to another project identified in condition 19 if the proponent and the CEO, in consultation with DEC, agree that better environmental outcomes may be achieved.	Redirection of funds if agreed by the proponent and the CEO	Revised funding plans Correspondence register	Overall	Ongoing.	NR	
930:M20.9	Residual impact and risk management measures	The real value of funds described in Schedule 4 will be maintained through indexation to the Perth consumer price index (CPI), commencing at the date of this Statement, unless otherwise agreed	Maintenance of funding value through indexation to Perth consumer price index	Funding plans Compliance Assessment Reports	Overall	Ongoing.	NR
